CONCEPT

The third Annual Forum for the EU Strategy for the Alpine Region (EUSALP) will be organised by the Italian Presidency in cooperation with the European Commission on 28 & 29 November 2019 in Milan.

Along the year 2019, the Italian Presidency of the EUSALP Strategy has implemented various actions in the field of green economy, youth and stakeholder's involvement and cultural preservation, which benefit to the entire Alpine area, in close cooperation with the countries of the Strategy.

Moreover, the political agenda of the European Commission and the ongoing activities related to the elaboration of the future programming period give a unique opportunity to have discussions with stakeholders to "shaping.future.together" for the Alpine region.

Therefore, the Annual Forum in November has a twofold objective. On the one hand, the event will bring together high-level personalities acting for the Alpine region from the local to the European level, in order to reiterate their commitment to the Strategy and to explore new windows of opportunities. Not only political and institutional personalities will be present, but also the socio-economic and academic world, civil society and the general public of the EUSALP area. On the other hand, the Annual Forum will be a time to present the results of the initiatives carried out during the year of the Presidency, and to discuss on the way forward preparing for the following French Presidency in 2020. Especially, one will give a dedicated focus on the main topics such as green economy, youth and stakeholders' participation in the EUSALP process and the enhancement of the Alpine cultural dimension.

All of the sessions established in the following agenda are meant to be in adequation with the current EUSALP's objectives (e.g : Economic Growth and Innovation, Mobility and Connectivity, Environment and Energy, and Governance, including Institutional Capacity). Discussions held in plenary sessions and/or during the workshops will contribute to improve the EUSALP's functioning and to set up an ambitious framework of objectives for the alpine area and its inhabitants.

Last but not least, the European Commission & the Italian Presidency are wishing to involve as much as possible Action Groups of the Strategy and all of the stakeholders of the Alpine region in the fruitful discussions.
